Vision & Goal

We recognize and nurture “innovative solutions” as part of our TIME values. We prioritize focus and resources guided by this value. The TIME way of Innovation is really about this deliberate sustained innovation. Our purpose of Innovation is to create higher value for our customers. This continuous thought led us to foresee the benefit of partnering with technology companies to bring value to our customers.

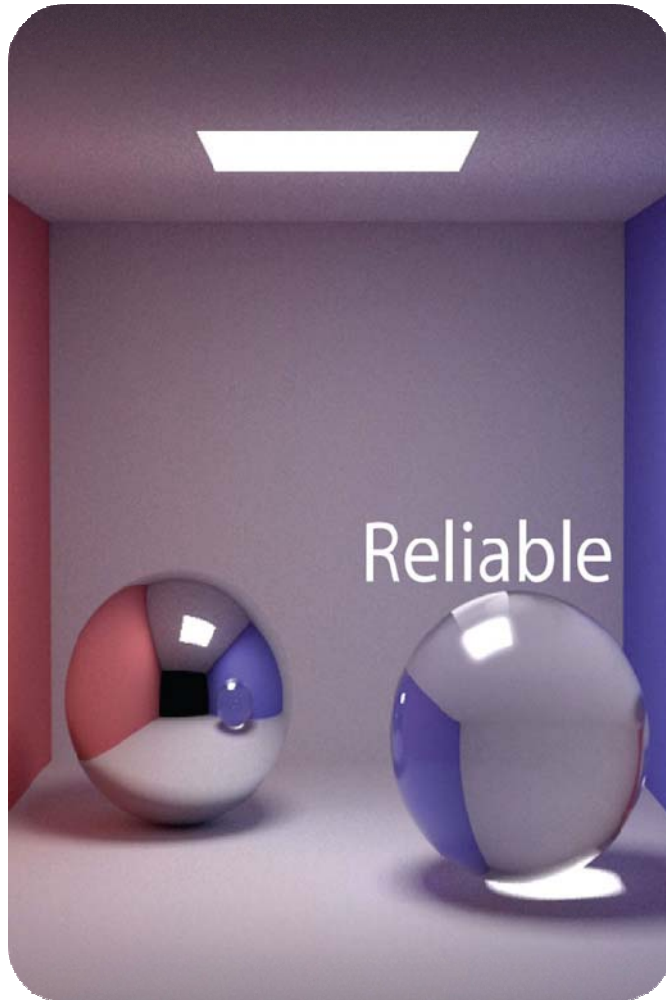

Our Vision

T.I.M.E. Co. Ltd will provide every client with exceptional service quality delivered on time every time.

Our Mission

Surpassing our clients’ trade and marketing, intelligent technology, strategic advertising, media, research, and event management needs.

Solutions and Services

TIMES's complete range of IT Services addresses the needs of both technology and business requirements to help organizations leverage leading-edge technologies for business improvement. We take charge of the IT needs of the entire enterprise. The gamut of services extends from Enterprise Application Services (CRM, ERP and SCM), to e-Business solutions. TIMES's enterprise solutions have served and continue to serve its clients.

- ERP : Enterprise Resource Planning
- SCM : Supply Chain Management
- CRM : Customer Relationship Management
- MRP : Material Requirement Planning
- BI/BPM : Business Intelligence/Business Performance
- Accounting S/W : Accounting Software
- Insurance S/W : Insurance Software
- Banking S/W : Banking Software
- Customized S/W : Customized Software

What Makes Us Different...

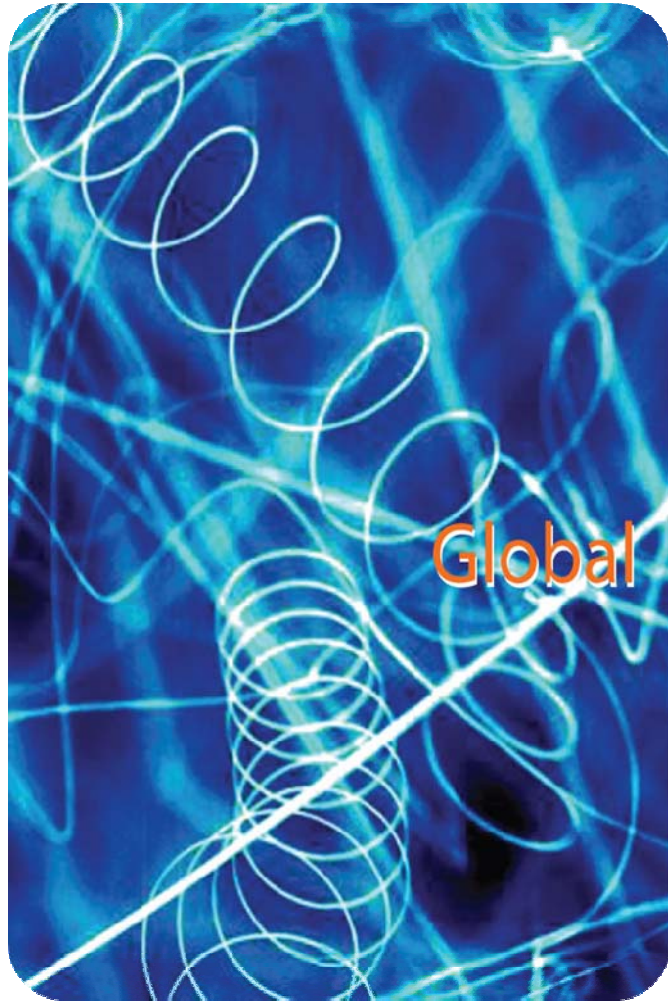

TIME has further differentiated itself from other IT solution and service providers by focusing on key performance drivers that help us generate exceptional results for our clients.

These include:

- Increased customer growth, retention and loyalty
- More easily sustained steady top line growth
- Improved technology ability to innovate around customer needs
- Enhanced quality solutions and services
- Increased productivity
- Achievement of real competitive advantage

Clients

Our clients are our organization strength; our approach to the delivery of information systems is based on a partnership with client firms. We focus on operational requirements, economic considerations and scheduling constraints. This approach, coupled with our experience and expertise in all areas of Information Technology, provides our clients with a "total solution".

Here is a partial list of our clients:

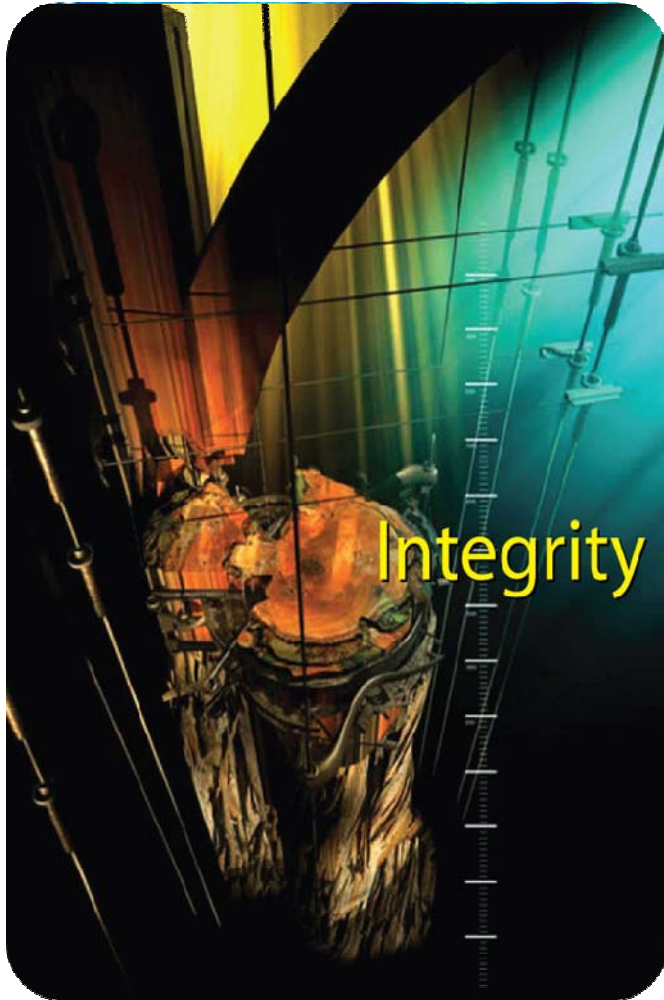

Project Management

When it's time for organizations to upgrade or replace important information systems, they will typically need additional human resources to complete these projects. TIME has the ability to provide our clients with the quality of the resources needed to complete these projects without adding to our client's permanent headcount.

We have workforce who are experienced. We can assist all phases of the application development life cycle, including ERP solutions, system integration, customized application implementation and ongoing support.

Quality Assurance

We combine our passion for software testing for quality ensure. We specialize in testing integrated systems. From this experience, we have developed advanced methodologies for managing and executing the testing process. We can deliver our Quality Assurance and Testing Services on your site as part of a joint testing team.
